Subject: Strategies for Paid Campaigns

Platform: Simplilearn | Strategies for Paid Campaigns

Date: April 2026

## Project Overview

This project is about creating a comprehensive paid campaign strategy for a beauty brand that is new to the online space. The brand wants to become a popular beauty brand across Asia and needs a clear roadmap to increase its revenue from \$50,000 to \$2 million using a \$1 million investment through Instagram marketing.

| Brand Detail     | Information        |
|------------------|--------------------|
| Brand Age        | 6 Months           |
| Revenue So Far   | \$50,000           |
| Revenue Target   | \$2 Million        |
| Marketing Mode   | Online – Instagram |
| Brand Investment | \$1 Million        |
| Target Market    | Asia               |

# Step 1: Research – Awareness, Discovery & Conversion Strategy

Since this beauty brand is only 6 months old and new to online marketing, the first step is to build a strong foundation through proper research. I have broken this into three key areas: Awareness, Discovery, and Conversion.

## 1.1 Awareness Strategy – Making People Know About the Brand

The goal of awareness is to introduce the beauty brand to as many potential customers in Asia as possible. Since the brand's marketing mode is Instagram, I recommend the following strategies:

- **Instagram Reels Ads:** Reels are the fastest-growing content format on Instagram. Running short 15-30 second video ads showing the beauty products in action will help reach millions of users across Asian markets like India, Indonesia, Philippines, Thailand, and Malaysia.
- **Influencer Marketing:** Partner with beauty influencers across Asia who have 50,000 to 500,000 followers (micro and mid-tier influencers). These influencers have highly engaged audiences and are more cost-effective than celebrity endorsements.
- **Instagram Story Ads:** Use full-screen Story ads with eye-catching visuals, before-and-after product results, and strong CTAs like 'Swipe Up to Shop'.
- **Hashtag Strategy:** Use a mix of branded hashtags like #BrandName and trending beauty hashtags like #AsianBeauty #SkincareRoutine #GlowUp to increase organic visibility alongside paid ads.
- **Brand Collaborations:** Partner with popular Asian beauty brands or lifestyle pages for shoutouts and co-branded content to quickly build brand recognition.

## 1.2 Discovery Strategy – Helping People Find the Brand

- **Instagram Shopping:** Set up an Instagram Shop so users can discover and purchase products directly within the app.
- **SEO-Optimized Instagram Profile:** Optimize the Instagram bio with searchable keywords like 'Premium Beauty Brand | Skincare & Makeup | Shop Now | Shipping Across Asia'.
- **Paid Discovery Ads:** Run Instagram Explore page ads since the Explore section is where users actively discover new content and brands.

### Key Keywords to Use in Ads and Content:

| Keyword Type      | Example Keywords                                                 |
|-------------------|------------------------------------------------------------------|
| Product Keywords  | skincare, makeup, beauty products, face cream, serum, foundation |
| Audience Keywords | glowing skin, beauty routine, self-care, skincare tips           |
| Location Keywords | beauty brand Asia, Korean skincare, Asian beauty, beauty India   |
| Trending Keywords | clean beauty, cruelty-free, vegan skincare, natural beauty       |

| Keyword Type    | Example Keywords                                             |
|-----------------|--------------------------------------------------------------|
| Action Keywords | shop now, buy online, free shipping, limited offer, discount |

### 1.3 Conversion Strategy – Turning Visitors into Buyers

- Instagram Shopping Ads with Direct Purchase CTA: Run ads specifically with 'Shop Now' buttons that take users directly to the product page.
- Retargeting Campaigns: Use Instagram's retargeting feature to show ads to people who visited the website but did not purchase.
- Limited Time Offers: Create urgency with countdown-based offers like '24-hour flash sale — 30% OFF on all products!'
- User Generated Content (UGC): Encourage customers to post their results and tag the brand. Repost this as social proof in ads.
- Free Shipping and Easy Returns: For Asian markets, offering free shipping removes a major barrier to purchase.
- Bundle Offers: Create product bundles like 'Skincare Starter Kit' at a discounted price to increase average order value.

## Step 2: Target Audience for Online Purchase

Identifying the right target audience is the most important part of any paid campaign. If ads are shown to the wrong people, the entire \$1 million investment will be wasted. Here is the detailed target audience profile I recommend for this beauty brand:

### 2.1 Primary Target Audience

| Audience Parameter | Details                                                               |
|--------------------|-----------------------------------------------------------------------|
| Gender             | Primarily Female (80%), Male (20%) for grooming products              |
| Age Group          | 18 to 35 years — the core beauty product consumers                    |
| Location           | India, Indonesia, Philippines, Thailand, Malaysia, Vietnam, Singapore |
| Language           | English, Hindi, Bahasa Indonesia, Filipino, Thai                      |
| Income Level       | Middle to upper-middle income — can afford premium beauty products    |
| Interests          | Skincare, makeup, beauty tutorials, fashion, self-care, wellness      |
| Behavior           | Online shoppers, beauty product buyers, Instagram active users        |
| Device             | Mobile-first (90%+ of Instagram users access via mobile)              |

### 2.2 Audience Segmentation Strategy

| Tier          | Audience Type                                 | Ad Objective            | Budget Allocation |
|---------------|-----------------------------------------------|-------------------------|-------------------|
| Tier 1 (Cold) | New users who don't know the brand            | Awareness & Reach       | 40% of budget     |
| Tier 2 (Warm) | Users who engaged with ads or visited website | Consideration & Traffic | 35% of budget     |
| Tier 3 (Hot)  | Cart abandoners and past visitors             | Conversion & Sales      | 25% of budget     |

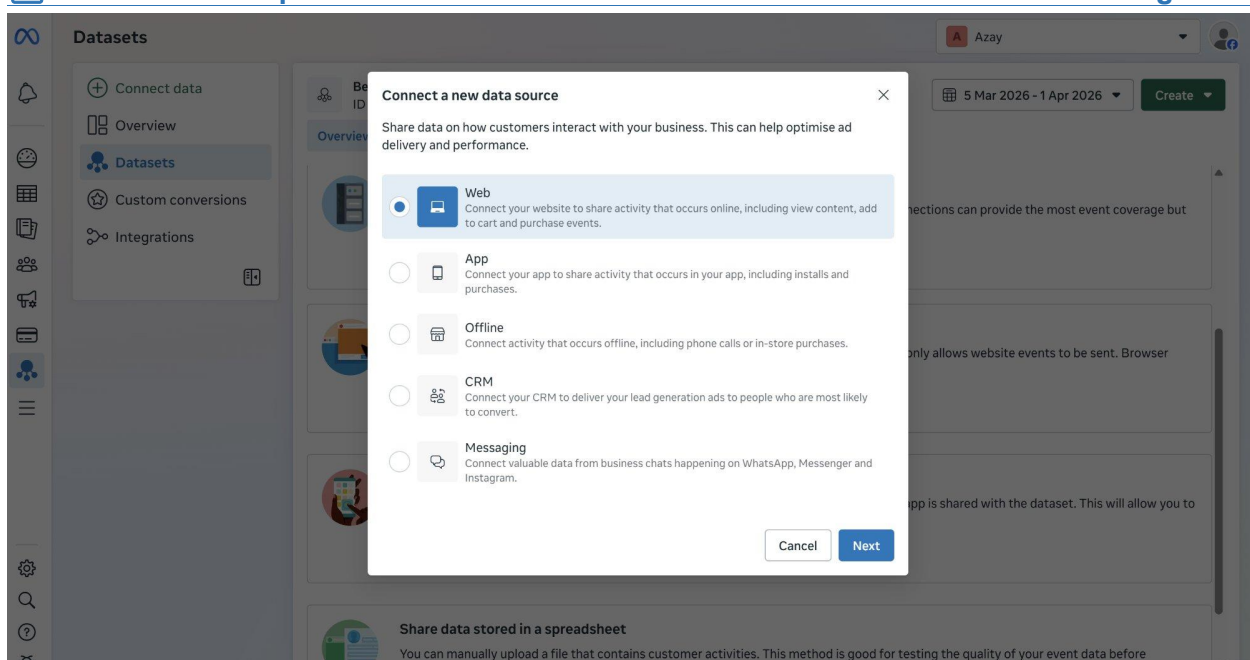

## Step 3: Staying on Top of Advanced Tracking Technology

For a beauty brand investing \$1 million in online marketing, tracking is absolutely essential. Without proper tracking, the brand cannot measure which ads are working, which audiences are converting, and where the budget is being wasted. Here is the complete process with screenshots showing the actual implementation:

### 3.1 Set Up Meta Pixel / Dataset on the Website

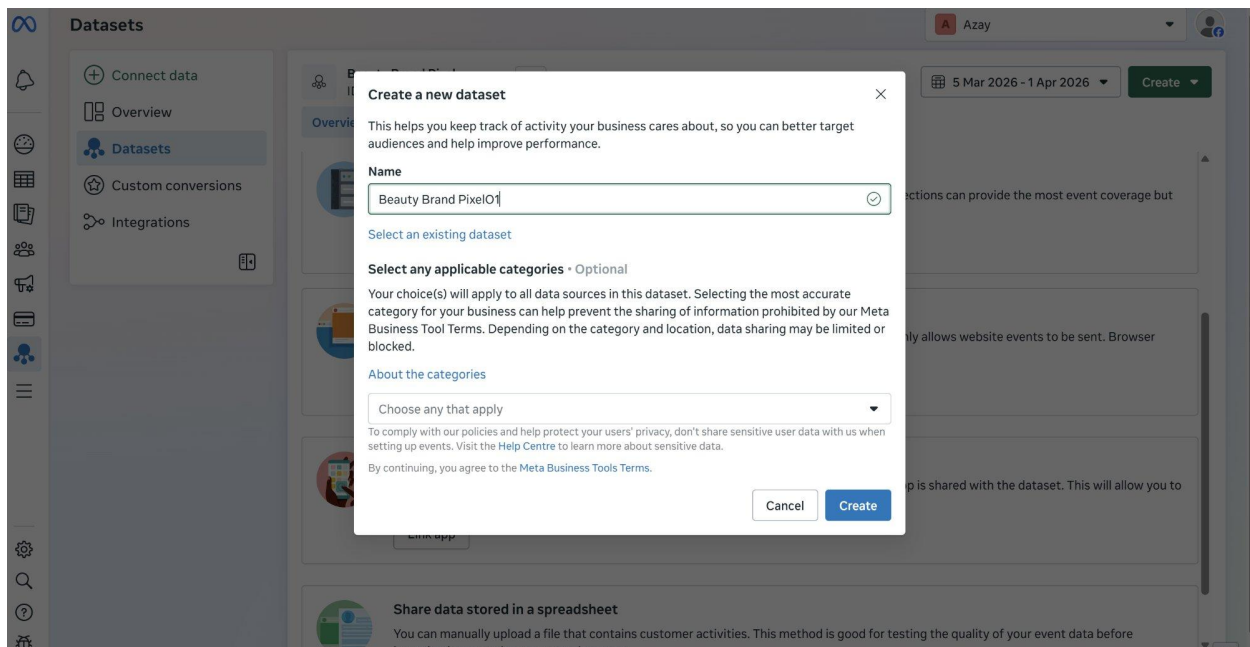

1. Go to Meta Business Manager → Events Manager → Datasets → Connect Data
2. Select 'Web' as the data source type
3. Create a new dataset and name it 'Beauty Brand Pixel'
4. Click 'Set up Meta Pixel' to get the pixel code
5. Copy the pixel base code and paste it in the website header
6. Verify the pixel is firing correctly

#### Screenshot: Step 1 – Connect Data Source: Web Selected in Meta Events Manager

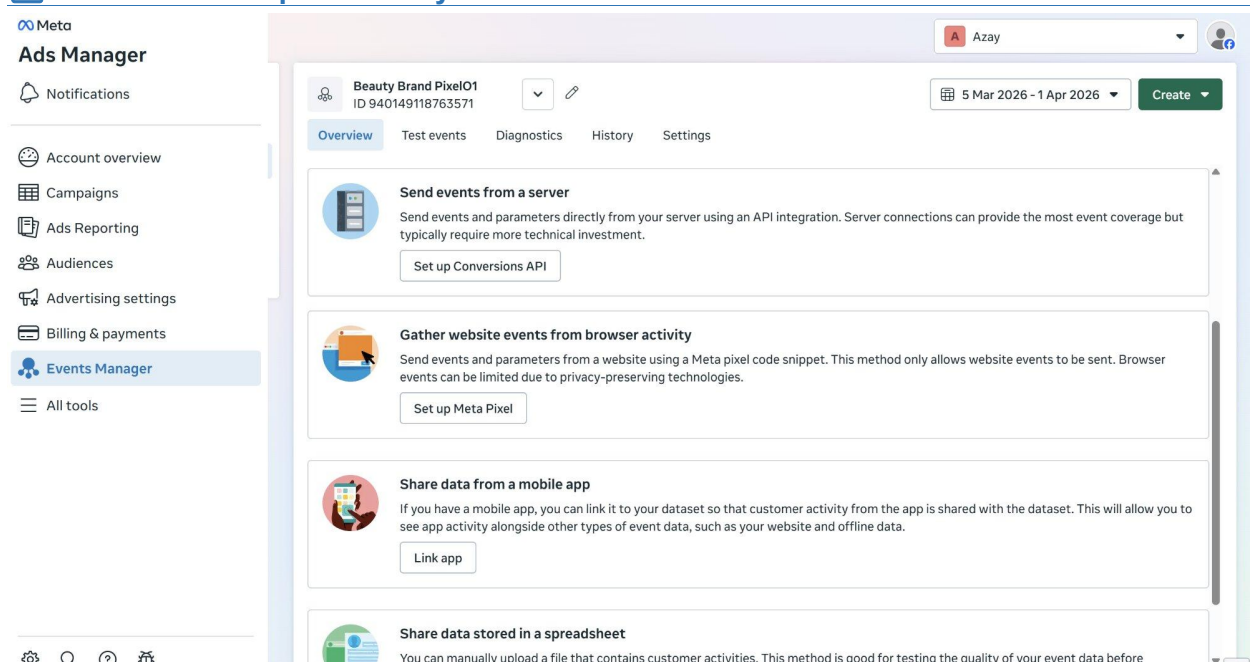

Analysis: This screenshot shows the Meta Events Manager 'Connect a new data source' screen. The Web option is selected (highlighted in blue) which is the correct choice for tracking website activity for the beauty brand. This is the first step in setting up the Meta Pixel to track customer interactions like page views, add to cart, and purchases from Instagram ads.

#### Screenshot: Step 2 – Creating New Dataset Named 'Beauty Brand Pixel01'

Analysis: This screenshot shows the 'Create a new dataset' popup in Meta Events Manager. The dataset has been named 'Beauty Brand Pixel01' which will serve as the Meta Pixel for the beauty brand's website. Creating a dedicated dataset for the beauty brand ensures all tracking data is organized separately and can be used to build custom audiences and optimize Instagram ad campaigns.

### Screenshot: Step 3 – Beauty Brand Pixel01 Overview with Pixel ID

Analysis: This screenshot shows the Beauty Brand Pixel01 overview page in Meta Ads Manager with the Pixel ID: 940149118763571. The page shows three connection options: Set up Conversions API (server-side), Set up Meta Pixel (browser-side), and Link app (for mobile apps). For the beauty brand's Instagram campaigns, the Meta Pixel option is the most important as it tracks all website visitor activity coming from Instagram ads.

## Screenshot: Step 4 – Install Meta Pixel Code on Website

**Install Meta pixel on your website**

The Meta pixel is a piece of code that you add to your website by copying the base code below and pasting it into the header section of your website.

- Copy base code**  
Copy the Meta pixel base code below.
- Paste base code to website**  
Paste the Meta pixel code between the `<head>` and `</head>` tags of your web page. You may already have other existing code between the head tags, so just place the pixel code underneath that, but above `</head>`. Install the base code on every page of your website. [See more detailed instructions](#)
- Save website code changes**  
Before returning to this screen, refresh your website to save and confirm the changes that you made to your website's code.

```
<!-- Meta Pixel Code -->
<script>
!function(f,b,e,v,n,t,s)
{if(!f.fbq)return;n=f.fbq=function(){n.callMethod?
n.callMethod.apply(n,arguments):n.queue.push(arguments)};

```

Analysis: This screenshot shows the Meta Pixel installation instructions page. It clearly shows the three steps: (1) Copy the base code, (2) Paste the base code to the website header, and (3) Save website code changes. The pixel base code is visible in the code box. This pixel code needs to be placed in the head section of every page of the beauty brand's website so Meta can track all visitor activity.

## Screenshot: Step 5 – Meta Pixel Code Successfully Installed in WordPress Website

Selected file content:

```

14
15 <!-- Mobile Specific Data -->
16 <meta name="viewport" content="width=device-width, initial-scale=1.0">
17 <meta http-equiv="X-UA-Compatible" content="ie=edge">
18
19 <?php wp_head(); ?>
20
21 <!-- Meta Pixel Code -->
22 <script>
23 !function(f,b,e,v,n,t,s)
24 {if(!f.fbq)return;n=f.fbq=function(){n.callMethod?
25 n.callMethod.apply(n,arguments):n.queue.push(arguments)};
26 if(!f._fbq)f._fbq=n;n.push=n;n.loaded=!0;n.version='2.0';
27 n.queue=[];t=b.createElement(e);t.async=!0;
28 t.src='//www.facebook.com/tr?id=940149118763571&ev=PageView&noscript=1';
29 s.parentNode.insertBefore(t,s)}(window, document, 'script',
30 'https://connect.facebook.net/en_US/fbevents.js');
31 fbq('init', '940149118763571');
32 fbq('track', 'PageView');
33 </script>
34 <noscript>img height="1" width="1" style="display:none"
35 src="https://www.facebook.com/tr?id=940149118763571&ev=PageView&noscript=1"
36 /></noscript>
37 <!-- End Meta Pixel Code -->
38
39 </head>
40 <body <?php body_class(); ?>
41
42 <?php
43 if ( function_exists( 'wp_body_open' ) ) {
44     wp_body_open();
45 }
46
47 $apex_business_transparency = get_post_meta( get_the_ID(), '_header_option_value_key', TRUE );
48
49 <a class="skip-link" href="#content">
50 <?php esc_html_e( 'Skip to content', 'apex-business' ); ?></a>
51

```

Analysis: This screenshot shows the Meta Pixel code (Pixel ID: 940149118763571) successfully installed in the WordPress website's Theme Header file (header.php). The code starting with '`<!-- Meta Pixel Code -->`' is visible at lines 21-37, placed correctly after the `wp_head()` function and before the closing `</head>` tag. This confirms that the pixel is now actively tracking all website visitor activity.

including PageView events, which is essential for the beauty brand to measure Instagram ad performance and build retargeting audiences.

### 3.2 Key Tracking Tools

| Tool                 | Purpose                     | What it Tracks                                        |
|----------------------|-----------------------------|-------------------------------------------------------|
| Meta Pixel / Dataset | Website behaviour tracking  | Page views, add to cart, purchases from Instagram ads |
| Google Analytics 4   | Website traffic analysis    | Sessions, bounce rate, revenue, user behaviour        |
| Meta Ads Manager     | Ad performance tracking     | CTR, CPC, ROAS, reach, impressions, conversions       |
| Instagram Insights   | Organic content performance | Reach, engagement, follower growth, story views       |
| Hotjar               | User behaviour on website   | Heatmaps, session recordings, user click patterns     |
| Google Tag Manager   | Tag management              | Manage all tracking codes without developer help      |

## Step 4: Effective Landing Page for Customers

A landing page is a dedicated web page where users land after clicking an Instagram ad. It has a single focused goal: to convert the visitor into a buyer. I used the Unbounce tool to build this landing page since it is specifically designed for high-converting landing pages and does not require coding skills.

### 4.1 Why Unbounce

- Drag-and-drop builder — no coding needed, the marketing team can build and edit pages easily
- Built-in A/B testing — test different headlines, images, and CTAs to find what converts best
- Smart Traffic feature — automatically sends visitors to the version most likely to convert
- Mobile-optimized templates — since most Instagram traffic comes from mobile, Unbounce ensures the page looks perfect on all screen sizes
- Integrates with Meta Pixel, Google Analytics, and CRM tools for seamless tracking

### 4.2 Landing Page Structure

#### Header:

- Headline: 'Glow Like Never Before'
- Sub-headline: 'Premium Beauty Products | Natural Ingredients | Free Shipping Across Asia'
- Hero image showing a beauty product or model
- Primary CTA button: 'Shop Now – Get 20% OFF'

#### Sticky Bar:

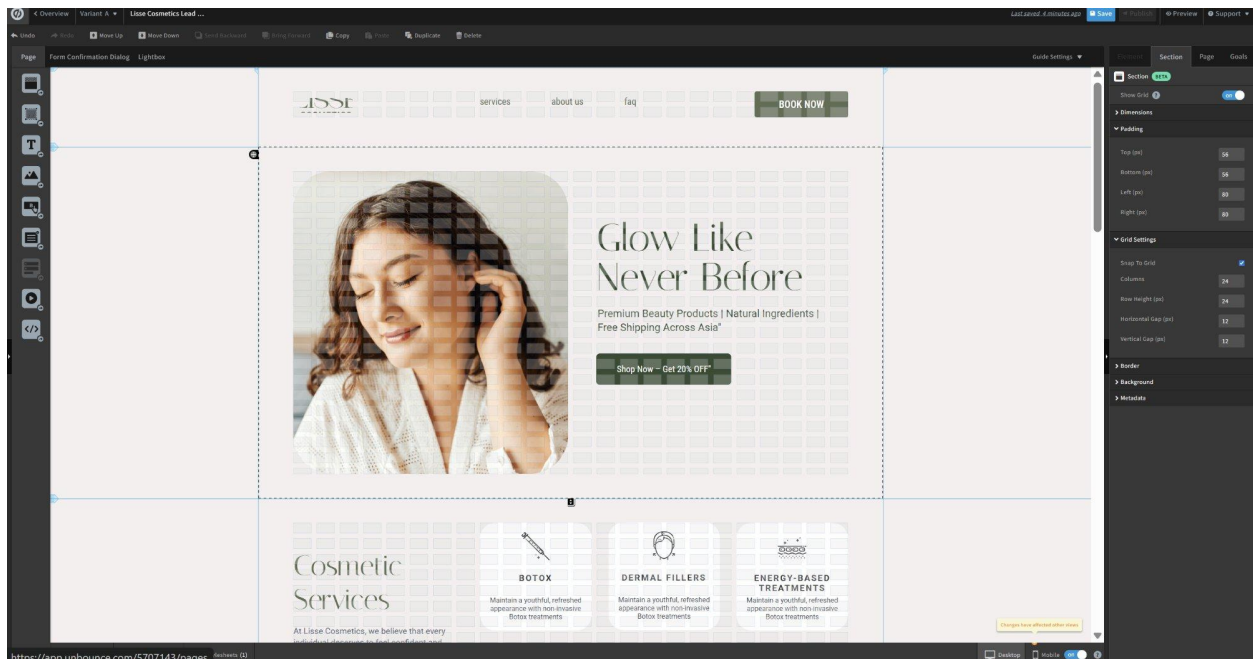

- Fixed bar at top: 'FREE Shipping + 20% OFF | Use Code: GLOWASIA | Offer Ends Tonight!'
- Creates urgency and is always visible as user scrolls

#### Other Sections:

- Social proof: Customer reviews, before-after photos, trust badges
- Product section: Clear images, key benefits, pricing with discount
- FAQ section: Answers common customer questions to reduce hesitation
- Secondary CTA: 'Add to Cart – Limited Stock Available!'

 [Screenshot: Unbounce Landing Page – Desktop View with Headline and CTA](#)

---

Analysis: This screenshot shows the beauty brand landing page created in Unbounce with the headline 'Glow Like Never Before' and sub-headline 'Premium Beauty Products | Natural Ingredients | Free Shipping Across Asia'. The green CTA button 'Shop Now – Get 20% OFF' is clearly visible which is designed to drive immediate purchases. The page uses a clean, elegant design with a beauty model image that is highly relevant to the target audience of women aged 18-35 across Asia. The layout follows best practices for high-converting landing pages with a clear headline, supporting text, and prominent CTA above the fold.

### Screenshot: Unbounce Landing Page – Mobile View (Optimized for Instagram Traffic)

Analysis: This screenshot shows the mobile view of the Unbounce landing page. Since over 90% of Instagram users access the platform via mobile devices, it is critical that the landing page is fully optimized for mobile. The mobile view shows the headline 'Glow Like Never Before', the beauty model image, the sub-headline, and the 'Shop Now – Get 20% OFF' CTA button all clearly visible and properly formatted for small screens. Unbounce automatically optimizes the layout for mobile which ensures a smooth user experience and higher conversion rates from Instagram ad clicks.

# Step 5: Dynamic Ad Platform & Factors for Successful Paid Campaign

## 5.1 Recommended Dynamic Ad Platform

Based on the brand's profile (new beauty brand, Instagram marketing mode, targeting Asia, \$1 million investment), I recommend Instagram Dynamic Ads through Meta Ads Manager as the primary dynamic ad platform.

### Why Instagram Dynamic Ads:

- Dynamic Ads automatically show the most relevant products to each user based on their browsing behavior, interests, and past interactions with the brand
- They work by connecting the brand's product catalog to Meta Ads Manager — once set up, the ads automatically populate with the right product for each individual user
- For a beauty brand with multiple products (skincare, makeup, hair care), Dynamic Ads ensure each user sees the product they are most likely to buy
- Highly effective for retargeting — showing users the exact product they viewed on the website but did not purchase

## 5.2 How to Set Up Instagram Dynamic Ads

1. Upload the complete product catalog to Meta Commerce Manager
2. Go to Meta Ads Manager → Create new campaign → Objective: 'Catalog Sales'
3. Select the product catalog you uploaded
4. Choose target audience — broad interest targeting for new customers, website visitors for retargeting
5. Select Instagram as the placement (Feed, Stories, Reels, Explore)
6. Set up the Dynamic Ad template — Meta auto-fills product details from catalog
7. Set daily budget and campaign duration
8. Launch and monitor performance daily in the first week

## 5.3 Sample Ad Structure

| Ad Element   | Content                                                                                                                       |
|--------------|-------------------------------------------------------------------------------------------------------------------------------|
| Ad Format    | Instagram Carousel (multiple products) or Single Image (hero product)                                                         |
| Primary Text | Your skin deserves the best. Shop our bestselling beauty range — loved by thousands across Asia. Free shipping on all orders! |
| Headline     | Glow Like Never Before – Shop Now                                                                                             |
| Description  | Premium beauty products   Natural ingredients   Cruelty-free   Ships across Asia                                              |

| Ad Element      | Content                                                                                    |
|-----------------|--------------------------------------------------------------------------------------------|
| CTA Button      | Shop Now                                                                                   |
| Landing Page    | Unbounce landing page built in Step 4                                                      |
| Target Audience | Women 18-35, interests: skincare, beauty, makeup — India, Indonesia, Philippines, Thailand |
| Ad Placement    | Instagram Feed, Stories, Reels, Explore Page                                               |
| Budget          | \$500/day for the first month to test and optimize                                         |

## 5.4 Factors Behind a Successful Paid Campaign

| Factor                   | Why It Matters                                             | How to Apply                                                        |
|--------------------------|------------------------------------------------------------|---------------------------------------------------------------------|
| Clear Campaign Objective | Every campaign must have one specific goal                 | Start with awareness for 1 month, then shift to conversion          |
| Right Target Audience    | Showing ads to wrong people wastes budget                  | Target women 18-35 in Asia interested in beauty and skincare        |
| Compelling Ad Creative   | Users scroll fast — ad must stop them in 2 seconds         | Use high-quality product images and short engaging videos           |
| Strong CTA               | Users need to be told what to do next                      | Use clear CTAs: Shop Now, Get 20% OFF, Claim Your Offer             |
| Optimized Landing Page   | A great ad with bad landing page kills conversions         | Use the Unbounce landing page with clear headline and easy checkout |
| A/B Testing              | You can never know what works without testing              | Test 2-3 ad variations — different images, headlines, CTAs          |
| Proper Budget Allocation | Wrong allocation = wasted money                            | 40% awareness, 35% consideration, 25% conversion                    |
| Tracking and Analytics   | Without data, you cannot improve the campaign              | Use Meta Pixel, GA4, and UTM parameters to track everything         |
| Retargeting Strategy     | Warm audiences convert much better than cold               | Retarget website visitors and cart abandoners with discount offers  |
| Consistent Monitoring    | Campaigns need daily attention especially in first 2 weeks | Check Meta Ads Manager daily and pause underperforming ads          |

## 5.5 Budget Breakdown for \$1 Million Investment

| Phase                  | Duration  | Budget    | Goal                                                 |
|------------------------|-----------|-----------|------------------------------------------------------|
| Phase 1: Awareness     | Month 1-2 | \$200,000 | Build brand awareness across Asia — reach 10M+ users |
| Phase 2: Consideration | Month 3-4 | \$250,000 | Drive traffic to website and Instagram profile       |

| Phase               | Duration   | Budget    | Goal                                                  |
|---------------------|------------|-----------|-------------------------------------------------------|
| Phase 3: Conversion | Month 5-6  | \$300,000 | Drive sales through retargeting and shopping ads      |
| Phase 4: Scale      | Month 7-12 | \$250,000 | Scale winning ad sets and expand to new Asian markets |

## Conclusion

This paid campaign strategy gives the beauty brand a clear, structured path to grow from \$50,000 in revenue to the \$2 million target. The key to success lies in three things: reaching the right audience, showing them the right message at the right time, and making it as easy as possible for them to purchase.

By following the awareness, discovery, and conversion framework in Step 1, targeting the right Asian audience in Step 2, setting up proper tracking using Meta Pixel in Step 3 (as demonstrated with actual screenshots), building a high-converting Unbounce landing page in Step 4, and running well-structured Instagram Dynamic Ads in Step 5 — the beauty brand has everything it needs to become a popular brand across Asia in a short span of time.

The \$1 million investment, when allocated smartly across the four campaign phases, can generate significant returns. With consistent monitoring, A/B testing, and retargeting in place, I am confident this strategy can help the brand achieve and even exceed its \$2 million revenue target.

*--- End of Project ---*
